12 years in games at Wargaming.net, nearly eight of them as Senior Creative Producer on World of Tanks Blitz, a free-to-play live-service title on mobile and PC. I led end-to-end production across UA, social, livestream and content, including IP collaborations with Snatch (Sony Pictures), UFC, The Walking Dead and deadmau5, and athlete shoots with Lukas Podolski, Joanna Jędrzejczyk and Jiří Procházka that I supervised on set.

● What I Bring

Performance Creative Production. UA videos, gameplay assets, creative testing, iteration loops and paid-channel production.

Creative Operations. Briefs, timelines, feedback loops, vendor coordination, budget discipline and scalable delivery pipelines.

ASO & Storefront Assets. Screenshots, icons, store trailers and Live Events art for Steam, the App Store, the Microsoft Store, Google Play and the Samsung Galaxy Store, with A/B-tested packages and icons.

Brand & Player Communication. Partner-ready IP work, CRM and email creative, Live Ops assets and player-facing updates.
